

VIS.TRACK

Product information

VIS.TRACK

Want a simple way to analyse your team's performance?

VIS.TRACK keeps you up-to-speed – live and on the move!

Using the latest camera technology and the most advanced computer programming techniques, VIS.TRACK allows you to analyse performance data for every player in real-time.

VIS.TRACK covers all of the action on the pitch with just two cameras. With our easy-to-use VIS.TRACK analysis tools, you can simultaneously see this information represented powerfully in 2D and 3D graphic animations.

Make up your own mind!

VIS.TRACK in action

VIS.TRACK does not require permanent installation – the system can be set up and ready for use in just a few simple steps.

This means that you're not limited to using VIS.TRACK in your own stadium – you can also use it on the training ground and in other stadia. The data captured is always rendered live and made available as a match report after the final whistle.

Advantages at a glance

- Accurate real-time data capture
- Simple web access to live performance data
- Half-time report and full-time match report ready immediately
- Mobile two camera system
- Quick and easy set-up (no permanent installation required)
- Can be used in the stadium and training ground
- Modular software structure
- 2D / 3D animated tactical analysis
- Drawing tools
- Export video clips and screenshots
- Service or sales model
- Patent pending

VIS.TRACK

Product information

VIS.TRACK analysis

To guarantee the very best analysis, the two VIS.TRACK cameras capture all the action in HD quality. Once the match is over, you can save and archive the video in other formats. The analysis software enables you to add another source video (DVD, TV recording, your own scouting camera) into the software. You can also create integrated match and training analyses in combination with 2D / 3D animations and performance graphics.
